SEWER RATES SET BY USAGE JANUARY THROUGH MARCH

Each year during the months of January through March the Town determines an average wastewater usage for each user. By using the average monthly volume of wastewater discharged to the sewer system. This average monthly volume shall be determined by the average metered water usage during the “winter base period” which covers the months of January, February and March of 2017.

Lochbuie residents rates are determined by the resident’s average monthly water usage during the winter base period and multiplying by the per-one-thousand-gallon charge in the rate schedule.
